

# Stockton Town Centre High Street Regeneration

Date: 24/09/2015

> 6.30 – 8.00pm

Venue: Stockton High Street

> meet at water feature

Recent national and regional publicity and spotlight is evidence that Landscape Architecture is still playing a major role in our region's big regeneration schemes. Stockton Borough Council have recently completed a £20m public realm improvement scheme for its High Street as part of a wider £38m investment in the town centre. The scheme was delivered by its in house multi-disciplinary design team with landscape architecture being at the very heart of the design and delivery process.

The scheme includes flexible market and events spaces incorporating an interactive water feature, 20,000m<sup>2</sup> of natural stone paving, 64no. semi mature street trees, bespoke street furniture and bespoke lighting columns. For this study tour we will be accompanied by members of Stockton's Urban Landscape Team.
